Information about material origin

We hereby confirm to the best of our knowledge and belief, that the products delivered by us were made from wooden raw materials that did not originate from controversial sources.

The wooden raw material used for the production of our products is subject to a rigorous internal risk assessment according to the latest PEFC-guidelines.

The following wood species are used for the production of our products.

Wood Species	Country of Origin
Spruce (Picea abies)	Germany, Austria, Belgium, Czech Republic
Spruce (Picea abies), nordic	Finland, Sweden
Pine (Pinus sylvestris)	Germany, Finland
Larch (Larix decidua)	Germany, Austria
Douglas fir (Pseudotsuga menziesii)	Germany

In case one of our suppliers delivers wooden raw materials to us that are retrospectively and against expectations classified as „significant risk“ by our risk assessment process, we promise to inform you immediately and to provide the necessary documentation to guarantee that you can identify the products concerned.
